

AGB Compact Hinge

MADE OF ITALY

Description

Adjustable hinge designed mainly for standard production flush interior doors at least 60cm wide, with 35mm minimum thickness and weight up to 65kg.

Adjustment and mounting

It can be adjusted vertically and horizontally by operating with allen screw of 4mm on the proper eccentric threaded pin positioned on the body of the hinge. Once the hinge is adjusted, fix the locking dowel with allen screw of 5mm.

Note:

mount the safety screw on the pin only after the door is inserted in the pintles; fasten the screw only after having executed eventual adjustments, with a maximum couple of 5Nm.

Material: Steel

Mini Door Thickness: 35mm

Max Door Weight: 65kg

The eccentric pin allows the adjustment on 3 dimensions when door is installed.

The special shape of the hinge allows a 180° opening

The rotating body of the hinge has minimum dimensions in order to reduce the visibility when door is closed
